Booth Spacing

Booths are available in single, double, 1/2 circle, 3/4 circle and wall benches. Using a wall bench with small tables allows easy conversion from couple seatings, to large parties.

- The QuickShip top cap is 1.75". The standard and custom top cap is 1.75" wide.
- The layout below, demonstrates using 46" long booths.
- A standard layout allows the table edge to overlap by 1” vertically with the outer edge of the booth seat. This provides a comfortable 17-18” seating depth.
- If using 30” wide tables, then booths require 72” from center to center of top caps.
- If using 24” wide tables, the space between booths can be reduced to 66” between the center of top caps.
- ADA requires a 36” wide table.
Aisle Widths

Wait staff aisles can be 24” to 30”, with service/main aisles 36”.
Recommended square inches per seat:
- Banquet (close seating): 96-120 sq/in per person
- Casual Dining: 120-144 sq/in per person
- White Tablecloth (spacious seating): 144-168 sq/in per person
- Shading representing 10” plates is shown on the diagrams below.

Table Sizes

The architectural standard for dining suggests that 300 square inches of space be allowed per diner.
- 24” table width is a minimum, suitable for a diner. 30” is the standard width.
- Family dining with platters in the center should consider 36” widths.
- Shading representing 10” plates are shown on the diagrams below.
